

**Running surface:**  
160x48cm

**Maximum speed:**  
- / -- Km/h. No limit

**Maximum user weight:** 180kg

**Dimensions:**  
187 x 93,4 x 166cm

## SPEC SHEETS

- Slat belt treadmill (curve) for high-intensity trainings
- No electricity requirements (it works with human energy)
- 6 resistance levels
- Contrary to conventional treadmills, the surface of the RUNMILL (with anti-impact slats) gets a smooth and anti-friction mechanical movement. This action allows an almost quiet work and less wear in the bearings and rest of the pieces.
- The slats are manufactured on aluminium with Poliurethane injection.
- 5" LCD console with different programs
- Acceleration mode (explosive) and resistance by friction.
- The height of the machine can be easily regulated in order to warranty the maximum stability.
- Wheels for easier transportation
- Perfect control of the speed
- No need of electricity plug; so ZERO ELECTRICAL CONSUMPTION.
- The handlebar is designed for allowing different trainings in different positions. Due to its biomechanics, the machine is proper for a huge variety of users.
